

MiSight 1 Day Myopia Control Patient Agreement

*WE WOULD LIKE TO TAKE THIS OPPORTUNITY TO WELCOME YOU INTO
OUR MISIGHT 1 DAY MYOPIA CONTROL PROGRAM.*

1. Introduction:

*MiSight® 1 day contact lens is the only FDA approved¹ soft contact lens indicated to slow the progression of myopia (nearsightedness) in children, aged 8-12 at the initiation of treatment^{1†}. Slowing of myopia progression is expected but not guaranteed. We are excited to journey together with your family in this program now and into the future. We are committed to be available along this journey and we ask for your commitment to the visit schedule and lens wear expectations.

2. Wear Time

The children in the clinical trial were asked to wear their lenses ≥ 10 hours per day and ≥ 6 days per week. Most enjoyed wearing their lenses 11 to 14 hours per day.^{2†‡}

3. Lens Wear – Insertion and Removal

To optimize a successful wearing experience, please review and follow the insertion and removal instructions provided separately. You can find instructional videos on the MiSight® YouTube channel.

4. Follow-Up Visits

This is an expected visit schedule to monitor your child's myopia progression and response to treatment. Your doctor will determine the most appropriate interval and number of visits, all included in the program.

Year 1	Year 2 and onwards
Comprehensive Eye Exam	Comprehensive Eye Exam
Myopia Consultation	-
Contact Lens Training	-
1 week follow-up	-
1 month follow-up	-
6 month follow-up	6 month follow-up

¹ Indications for use: MiSight® 1 day (omafilcon A) soft (hydrophilic) contact lenses for daily wear are indicated for the correction of myopic ametropia and for slowing the progression of myopia in children with non-diseased eyes, who at the initiation of treatment are 8-12 years of age and have a refraction of -0.75 to -4.00 diopters (spherical equivalent) with ≤ 0.75 diopters of astigmatism. The lens is to be discarded after each removal.

†Compared to a single vision 1 day lens over a 3 year period.

‡ Mean wearing times at 72-month visit 13.92 hours/day (children refit to M1D) and 13.90 hours/day (children wearing M1D for 6-year study duration).

5. Costs

Program fee (each year): \$1600 (\$800/eye)

What's included in your MiSight® 1 day Myopia Control Program fee:

- 12-month supply of lenses (Cooper Vision offers a rebate)
- free shipping of contact lenses
- exchanges and returns for any power changes for unopened boxes
- parent/child starter kit
- all visits related to myopia management outside of the comprehensive eye exam.

If at any time during the program your child experiences eye pain, discomfort, and/or redness, your child should remove the lenses immediately and you should contact our practice to speak with your doctor (or if the office is closed, contact our after-hours phone number at (214) 455-8559).

Diagnosis and treatment of any eye infection, corneal abrasions, or other eye conditions other than myopia are not part of the Myopia Control Program and are therefore subject to additional expenses and, if applicable, your medical insurance co-pays and deductibles.

6. Acknowledgement:

I have read all the above information and understand the commitment asked of my child and I to maximize my child's success. I hereby authorize Dr. Elliott or Dr. Chen to initiate the MiSight® 1 day Myopia Control Program for the child identified below.
